

‘To ensure the reliability of our heating systems and to provide protection of our boilers we invested in the EnwaMatic® technology in 2008. Since installation, our water treatment program is on track, services have improved, our systems are protected and our maintenance is planned and easy to manage’.

John East, Maintenance Manager, St Dunstan’s College, Catford

If you experience any problems due to scaling, corrosion, leakages or general poor water quality, if your heating systems are old, temperamental and you’ve had unplanned closures, if you have classrooms that are too hot and others too cold, then all you need is a reliable solution that can be easily retrofitted without any disruption to the school.

If you would like to reduce your wastage, carbon footprint and H&S risks then **EnwaMatic®** is the answer. We have units to treat all sizes of heating systems. If you would like to know more about how we can help please call on 01530 830 354.
