

# Ysybyty Ystrad Fawr, Hospital Caerphilly.

Trust: Aneurin Bevan Health Board

ENWA have delivered EnwaMatic® to this highly prestigious project in Caerphilly, Wales. The units will provide sidestream filtration and water treatment to the main energy centre and secondary heating systems.

This is the largest hospital to be built in Wales in the last 30 years, The £175m project will provide 255 single occupancy rooms and is designed to replace all other hospitals in the area. Works scheduled to complete Autumn 2011.
