

The control of bacteria & viruses in water systems.

Subjects include:

- **Legislation and risk management**
- **Approved code of practice and guidance on regulations**
- **Reducing Risk: Identifying the key issues which proliferate organisms and in particular Legionella**
- **The control of legionella bacteria in evaporative cooling systems. HSG274 Part 1**
- **The control of legionella bacteria in domestic water systems**
- **Disinfection & treatment methods including:**
 - **Common biocides**
 - **Chlorine and Chlorine Dioxide dosing**
 - **UV Sterilisation**
 - **Advanced Oxidation**
 - **Silver & Copper Ionisation**
 - **Ultra Filtration**

The presentation can be modified for specific site requirements e.g. hospitals, universities, hotels, pools & spas, cooling towers or other.

The presentation lasts approximately 45 minutes, with time for questions and discussion.

CPD certificates are issued to all attendees.

HSE Guide

Approved Code of Practice (ACOP) (L8)

"Provides practical advice on the legal requirements of the relevant legislation concerning the risk from exposure to legionella bacteria. Dutyholders, including employers, those in control of premises and those with health and safety responsibilities for other people must comply with their legal duties."

Effective design of water system and disinfection methods backed with correct operation and cleaning ensures compliance and reduce risk to health and save lives.
